Family Learning Series Family Science Night (Grades K-5)

Dear Families of K-5 Students,

After two and a half years of upended education, it is nice to be nearly normal! To that end, the three elementary schools invite you to the first event in the 2022-2023 Family Learning Series: K-5 Science Night. This will provide you an opportunity to see firsthand what your students are doing in science class. Science investigations allow children to be very hands on and learn by doing, while simultaneously promoting social interaction.

Please join us on **Tuesday, November 29 from 6:30-7:45pm at Peter Muschal Elementary**. The evening will include a brief introduction to the science program, followed by teacher-led activities that are appropriate for students at each grade level. Once the activities are finished, light refreshments will be served.

If you are interested in attending the K-5 Science Night, please **register each student separately by November 9** by [clicking here](#). Please note that because different grade levels may be in different rooms, each child in attendance should have one adult present. In addition, registration is on a first-come, first-served basis.

Sincerely,

Andrea Knorr, PhD
Supervisor of Math & Science, 6-12
Bordentown Regional School District
